

## Boosting up your bussiness performance

We help companies to improve their processes and bring in innovation into their business through the implementation of leading collaborative applications.

As CollabNet's preferred distribution and technology partner in Latin America we resell all of their products and provide support, training, and customization services to ensure successful implementation.

	Solutions
Application Lifecycle Management (ALM)	<p><b>Accelerate Productivity and gain project governance.</b> Our ALM solutions enhance project management and time-to-market software delivery.</p> <p>To reliably deliver quality software, IT organizations need more than just a collection of individual tools. However most development companies consist of disconnected teams and siloed tools that make it difficult to establish and manage cross-lifecycle processes.</p> <p>CollabNet's solutions solve this problem by combining integrated ALM capabilities and an extensible ALM framework within a single Web-based environment, which allows distributed teams to manage all phases of the software development lifecycle, from requirements through release.</p>
Reuse and SOA	<p><b>Flexible Platform for Shifting Trends and Technologies.</b> Our solutions encourage reuse and streamlines SOA development.</p> <p>CollabNet Platform is both structured and flexible enough to enable CIOs and software development executives to set, measure, and improve their development processes, and help project teams to understand and complete their specific development tasks in view of the overall lifecycle.</p>
Software Configuration Management (SCM)	<p><b>Project tracking for improved project management.</b> Our SCM solutions facilitate change tracking and team collaboration.</p> <p>Our CollabNet SCM solutions allow organizations to control, communicate and respond more effectively to rapidly changing business demands. Furthermore, they help to establish standardized workflows that allow a better change management and control.</p>
Continuous Integration and Agile	<p><b>Agile Continuous Build and Test for everyone, anywhere.</b> Distributed project teams can run agile across all lifecycle stages regardless of location or role.</p> <p>CollabNet TeamForge new Build and Test functionality tightly integrates the distributed application lifecycle management capabilities with Hudson's continuous build and test capabilities. In addition, TeamForge Build and Test, allows users to provision servers on demand from private and public clouds using TeamForge LabManagement.</p>
